

# TeleResults-*i*Tx

---

## State of the art Transplant Software offered now as web-hosted solution

TeleResults-*i*Tx helps transplant centers become UNOS compliant by having a source of verifiable data, uploading several forms to UNOS, and keeping track of when forms are expected.

### TeleResults-*i*Tx will provide:

#### Management

- Central data repository for all transplant related Patient Health Information (PHI)
- Efficient management of transplant patients, both recipients and donors

#### Control

- Clinician based workflow
- Access to all data through secure channels
- Audit trail for access, activity, and accountability

#### Reporting

- Built-in reporting capabilities including outcome measurements
- Uploading several forms to UNOS

### TeleResults-*i*Tx SaaS (Software as a Service) offering:

- Web hosted application-provided as a service
- No installation or integration efforts
- No hardware to purchase or maintain
- Fast deployment

### About TeleResults:

- TeleResults is a leading provider of transplant specific solutions and delivers excellent customer service. Our customers vary from small transplant centers to large teaching hospitals and research centers.
- Based in San Francisco, the TeleResults team has more than 14 years of experience in development and implementation of transplant specific systems.
- TeleResults-*i*Tx is an industry recognized “state of the art” solution developed through collaboration with numerous transplant centers using a multidisciplinary approach.
- More than 24 hospitals including multi-organ teaching institutions have selected TeleResults as the central data repository for their transplant information.
- More than 250,000 patients are collectively being tracked and managed by TeleResults.

**With industry standard expertise, a customer proven solution, and a cost saving SaaS delivery model with standard configurations, TeleResults is the right partner for you.**
